

## Straight Glass Refrigerated Display Bars

These units match the range of "E" series hot food display bars and together they offer the combination of displaying hot and cold foods with uniform, modern appearance. They are designed to take a variety of gastronorm pans up to 65 mm deep. Available with cold plate cooling\* or combination cold plate and cross fin coil cooling. Set of 1/2 size 65 mm pans included.

### FEATURES

- All stainless steel construction with tubular frame
- Refrigerated cold plate and cross fin coil technology
- Quality refrigeration unit running on environmentally friendly R404A refrigerant
- Overhead fluorescent light
- Quiet operation
- Safety lock ball valve drain
- Streamlined for easy cleaning
- Adjustable digital thermostat with temperature readout
- Removable cross bars
- Rear roller doors fitted as standard

Adjustable digital thermostat, 0 °C to 8 °C

*\*Safety regulations require careful preparation, handling and storage of food products at all times. Cold plate units operate with a single refrigeration coil attached to the underside of the tank, thus food is chilled from underneath. In contrast, Cross Fin coil units have an additional refrigeration coil located above the level of the pans that helps cool that space as well. For this reason, Roband highly recommends the consideration of Cross Fin unit for all situations. Unless users are absolutely certain that a single refrigeration coil will suit the purpose and are in compliance with food safety standards, Cross Fin coil units are recommended at all times.*

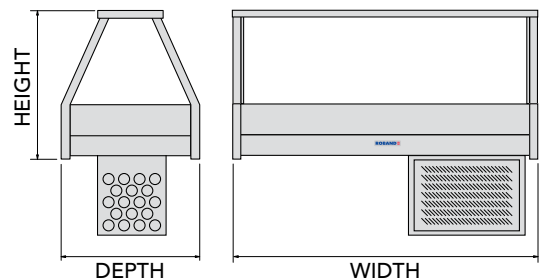

### SPECIFICATIONS

MODEL	NO. OF PANS	POWER Watts <sup>^</sup>	CURRENT Amps	DIMENSIONS w x d x h (mm)
DOUBLE ROW - COLD PLATE - INC. ROLLER DOORS & PANS				
ER22RD	4	480	2.1	705 x 615 x 675
