

HyginX Glass, Bottle & Jug Fillers

Sanitation and maintaining hygiene standards is very important in today's society and is crucial to reduce risk of infection. Introducing HyginX series glass and bottle/ jug filler faucets. Specifically built to endure the harsh realities of high frequency usage environments. Push activation that delivers a quality filtered or non-filtered water bottle, cup or glass quick and easy. Hygienic, reduced hand contact, and built to last.

Whether complying with the Liquor Regulation act or for use in public areas, HyginX is the perfect solution to provide for the hygienic dispensing of water and ensuring compliance is met. This touchless dispenser offers a simple solution to help reduce germs and the risk of cross contamination.

With touchless faucet, water only flows when it is actually needed. When blue is released then the flow of water stops. No electricity is required.
