

KAY BEE TRADING

OIL FILTER MACHINES

About Kay Bee Filters

- ◉ Australian Owned & Manufactured since 1978
- ◉ Most popular oil filter machines on the Australian market
- ◉ Simplest and most efficient filtering system available

Advantages to Oil Filtering

- ◉ Enhances the taste, appearance and quality of the food you produce
- ◉ Saves labor time – cuts fryer vat cleaning and oil filtering time to a matter of minutes
- ◉ Filtering becomes fast, efficient, clean and most importantly safe
- ◉ Filtering prolongs oil life by at least 50%

Safe & Easy to Use

- ◉ No manual handling of **"HOT"** Oil – Oil can be filtered at any time and safely handled by junior staff without supervision
- ◉ Minimal training required
- ◉ No buckets or lifting required
- ◉ Machines are compact and easy to use

Save Time & Money

- ◉ ***Time Saving*** – Faster and Safer than manual filtering
- ◉ ***Oil Cost Saving*** – Daily filtering will extend the life of your oil by 50%
- ◉ ***Long Term Saving*** – No outside contractors required
- ◉ ***Return on Investment*** – Time savings + Oil cost savings = Quick Return on your investment

Product Range – KBE-1S

- ◉ Economy Machine
- ◉ 35Ltr Capacity
- ◉ Suitable for Small Light Use Fryers
- ◉ Takes 31cm Round Food Grade Filter Papers + 70 Micron Poly Mesh Filter Bag (Re-Usable)

Product Range – KBC-1S

- Compact Machine
- 38Ltr Capacity
- Suitable for Small to Medium Capacity Fryers
- Takes Conical and 31cm Round Food Grade Papers

Product Range – KBS-4S

- Standard Machine
- 50Ltr Capacity
- Suitable for Medium to Large Capacity Fryers
- Takes Conical and 41cm Round Food Grade Papers

Battery Operated Machines

- Kay Bee Battery Operated Oil Filter Machine awarded Best New Hospitality Equipment Product at Fine Food Australia 2013 in Sydney

Product Range – KBE-1SB

- ◉ Economy Machine
- ◉ 35Ltr Capacity
- ◉ Suitable for Small Light Use Fryers
- ◉ Takes 31cm Round Food Grade Filter Papers + 70 Micron Poly Mesh Filter Bag (Re-Usable)

Product Range – KBS-4SB

- Standard Machine
- 50Ltr Capacity
- Suitable for Medium to Large Capacity Fryers
- Takes Conical and 41cm Round Food Grade Papers

Quality Production

- ◉ Manufactured to Australian Standards
- ◉ Unique Design to Avoid Blockages
- ◉ Quality Materials Used:
 - > 304 Food Grade Stainless Steel
 - > ½ HP High Temperature Motor & Pump
 - > High Quality Swivel Castors
 - > Convoluted Teflon Stainless Steel Braided Hose
 - > Food Grade Filter Papers

Steps on How to Use

● Step One

● Insert Base Filter Paper

- > 31cm for Economy & Compact Machines
- > 41cm for Standard Machine

Steps on How to Use

- **Step Two**

- Insert Conical Filter Paper into Conical Filter Basket

- Insert Conical Basket into hole in lid

Steps on How to Use

- **Step Three**
- Open fryer door, fit drain extension to drain outlet
- Wheel filter to fryer and position under drain outlet

Steps on How to Use

- **Step Four**

- Open drain outlet, allow oil to drain into filter

- Turn on and filter oil while washing down fryer walls and base

Steps on How to Use

- **Step Five**
- Recirculate oil at least 3 times for best results
- Once oil has been filtered close the drain outlet and pump the filtered oil back into the fryer

Steps on How to Use

- **Step Six**

- When filtering is complete turn off filter and hold nozzle and hose in the air for approx 20sec allowing oil residue to drain back into base and prevent any blockages
