PLACING LS UNITS IN COUNTER

1. Lifting brackets are fitted to assist removing the unit from the packaging and placing into cabinetry. Use a lifting bar that can fit through the 35 x 35mm square hole. (Bar not supplied)

2. Use four people lifting each corner.

3. After unit has been placed in the required position remove the lifting bracket bolts and retain for fixing the gantry posts.

All accepted local safety work wear and standards should be adhered to with a safety programme developed before undertaking of this kind of lifting work.
