

## The integrated smoking function for FlexiCombi MagicPilot 6, 10 and Team 6.1 + 6.1

Product Advantages:

- The smoker box is permanently installed on the Combi and enables smoking to be carried out in the cooking zone.
- Smoking function can be programmed in combination with other cooking methods.
- Caters for process reliability including HACCP documentation.
- Can also be operated as steamer, combi-steamer or hot air.
- Indicator light for safety temperature limiter.
- 4 different intensity levels.
- Space saving.
- Allows wood chips and spices to be easily loaded using a pull out drawer.
- Safe to use as there is no need to touch the hot smoker unit.

Installation requirements:

- Installed at time of manufacturing.
