

Hudson Outdoor Gas Heater and Fireplace

Colour-Black or White

- A new, different, and unique design for the Australian market which has a longer seasonal use than a traditional outdoor heater. Create pure ambiance and experience.
- Upgradable from LPG to Natural Gas which is approved by AGA.
- Lower profile height 1.35m. Easy for storage
- Heat output 7.3 KW or 23 Mj/Ph from all sides
- Lava rocks and AGA approved gas hose included.
- Australian Gas Certified and tested. To ensure our products are safe and compliant.

Enhance your outdoor space and create pure ambiance and experiences with the classic elegance of the Hudson Outdoor Gas Heater and fireplace.

Choose between sleek black or white finish and enjoy an unobstructed view of adjustable flames through four large glass sides. Experience added warmth with lava rocks and the convenience of an AGA approved LPG hose. Personalise your set up with optional glass stones, extra lava rocks, and covers, all available separately. With a 9kg gas bottle, this fire can glow for up to 18 hours at a medium setting.

Explore the option to upgrade to a Natural Gas (kit sold separately, professional installation required), and don't forget to consider an outdoor cover for enhanced protection.
